

RAPID T10M BENDING MACHINE

PIPE BENDING MACHINES MANUFACTURED FOR SWADESIR INTERNATIONAL
IN ITALY

- The motor-driven pipe bending machines "RAPID" fitted with silent electrohydraulic pump, remote-controlled by a two-way valve, are practical for the special accuracy with which they have been designed.
- The pump with radial pistons is complete with a limit valve that enables an automatic oil discharge once the maximum pressure has been reached, keeping the working pressure unchanged
- Each one of these models is also fitted with a sturdy two-storey working table.
- The hydraulic pump is placed on the lower storey, while the pipe-bending machine is placed on the upper storey. The "Rapid" can be used also by hand if desired.

THESE MACHINES ARE AVAILABLE IN THE FOLLOWING MODELS
